Acknowledge

The thirst for learning, upgrading technical skills and applying the concepts in real life environment at a fast pace is what the industry demands from IT professionals today. However busy work schedules, far-flung locations, unavailability of convenient time-slots pose as major barriers when it comes to applying the concepts into realism. And hence the need to look out for alternative means of implementation in the form of ladder approach.

The above truly pose as constraints especially for our students too! With their busy schedules, it is indeed difficult for our students to keep up with the genuine and constant need for integrated application which can be seen live especially so in the field of IT education where technology can change on the spur of a moment. *Well, technology does come to our rescue at such times!!*

Keeping the above in mind and in tune with our constant endeavour to use Technology in our training model, we at Aptech have thought of revolutionizing the way our students learn and implement the concepts using tools themselves by providing a *live and synchronous eProject learning environment!*

So what is this eProject?

eProject is a step-by-step learning environment that closely simulates the classroom and Lab based learning environment into actual implementation. It is a project implementation at your fingertips!! An electronic, live juncture on the machine that allows you to

- Practice step by step i.e. ladder approach.
- Build a larger more robust application.
- Usage of certain utilities in applications designed by user.
- Single program to unified code leading to a complete application.
- Learn implementation of concepts in a phased manner.
- Enhance skills and add value.

- Work on real life projects.
- Give a real life scenario and help to create applications more complicated and useful.
- Mentoring through email support.

The students at the centre are expected to complete this eProject and send complete project along with the documentation to eProjects Team

Looking forward to a positive response from your end!!

We also thank you so much for your information and the “demo” project from India APTECH to help us get more reality experience in this project. Since we have gained more experience from this project, we will not stop learning anything as much as we can to be more successful in the future.

Your Sincerely,

Team Group 03.

Synopsis

The Objective of this program is to give a sample project to work on real life projects. These applications help you build a larger more robust application.

The objective is not to teach you JavaScript/Dreamweaver but to provide you with a real life scenario and help you create basic applications using the tools.

You can revise the chapters before you start with the project.

This project is meant for students who have completed the module of **HTML5**. These programs should be done in the Lab sessions with assistance of the faculty if required.

It is very essential that a student has a clear understanding of the subject. Students should go through the project and solve the assignments as per requirements given.

Kindly get back to eProjects Team in case of any doubts regarding the application or its objective

Design Plan: Wedding Planner	Document Name: Problem Definition	SWD/Form No.01/PD/Ver1.0
Effective Date: 07-12-2022	Version 1.0	Page No: 1 of 21

Problem Definition

A website “wedding planner” needs to be developed. The main objective of developing this site is to create a static website for the wedding planner, from which user can get the details of the wedding such as about wedding planner, venue, theme, contact details, address, images etc. Any dynamic type of database operations need not be included in the website.

Requirement Specification:

The Web site is to be created based on the following requirements.

1. Home page: It contains basic information about the wedding planner system.
2. About page: It contains all about the wedding planner system information and their working.’
3. Gallery page: This page contains all the related images of venue, general decoration, themed decoration, dinning arrangements etc.
4. Register page: Here user can easily register on the website and confirmation message will be displayed after registering.
5. Contact page: user can submit their contact details.
6. Login: user can login with credentials and check the related information.
7. Forgot password: user can retrieve the password.
8. The Home Page should be created with proper sections, graphics and with a suitable logo.

Customer Requirements Specifications

User:

input:

- Customer registration data
- Customer service choice
- Content customers need advice
- Suggestions for admin

Process:

- Search for information about the wedding venue
- Find information about wedding planning services
- Wedding planning consultation
- Find the right wedding dress
- Check member registration information
- Design invitation cards

Output:

- Notice of successful/failed member registration
- Details of the wedding venue are searched

Effective Date: 07-12-2022	Version 1.0	Page No: 5 of 21

Webmaster:

input:

- Login with admin information
- Enter information about the customer's wedding booking service
- Details of wedding venue details add/edit/delete
- Details about wedding dresses add/edit/delete
- Suggested information about invitation card designs
- Respond to admin comments

Process:

- Add/edit/delete wedding venue information
- Add/edit/delete wedding services
- Add/edit/delete suggestions for wedding planning
- Add/edit/delete wedding dress information
- Add/edit/delete invitation design suggestions
- Remove members
- Check feedback
- Delete comments

Design Plan: Wedding Planner	Document Name: Final checklist	SWD/Form No.07/FC/Ver1.0
Effective Date: 07-12-2022	Version 1.0	Page No: 14 of 21

Final checklist

Sr.No	Aspected Tested	Suggestion/ Remarks
1	Are all the users able to view the images and links?	Yes
2	Have all the views, modules and controllers been properly integrated and is the site function as a single page application?	Yes
3	Are the GUI content devoid of spelling mistakes?	Yes
4	Is the application user-friendly?	Yes
5	Is the Website launching correctly in all popular browsers?	Yes
6	Are all the forms validated with proper criteria?	Yes
7	Do all text links lead to the appropriate website?	Yes
8	Do all image links lead to the appropriate website?	Yes
9	Are all the images and links clearly visible on the page?	Yes
10	Does the Web page work properly in all the tested browsers?	Yes
11	Does the Web page take too long to be loaded fully?	Yes
12	Is the navigation sequences correct through all the Web pages on the site?	Yes
13	Is the JavaScript code working as expected in all click events?	Yes
